

Diabetes In GREENVILLE County, 2005

Produced by the South Carolina Department of Health and Environmental Control

Impact of Diabetes in the United States

- Diabetes affects more than 23 million Americans and contributes to almost 234,000 deaths a year.
- Diabetes is becoming more common in the United States. From 1980 through 2007, the number of Americans with diabetes increased from 5.6 million to 17.9 million
- The direct and indirect costs of diabetes in the U.S. were nearly \$174 billion in 2007.
- 72,507 people died of diabetes in the U.S. in 2006.

Diabetes in South Carolina

- Approximately 332,000 adults in South Carolinians are diagnosed with diabetes. African Americans have twice the prevalence than Whites.
- The total direct costs of hospitalizations and emergency room visits were over \$8.5 billion in 2005.
- Diabetes is the seventh leading cause of death in South Carolina, claiming 1,183 lives in 2005.

Behavioral Risk Factors

- Major behavioral risk factors, such as overweight, physical inactivity and unhealthy diet, are partially responsible for development of type 2 diabetes (Fig 1).

Diabetes Prevalence

- An estimated 24125 adults (7.8% of adults) in Greenville County suffer annually from Diabetes (Fig 2).

Hospital and Emergency Room Discharges

- In 2005, there were 602 hospitalizations for Diabetes in Greenville County for all ages.
- There were an additional 6611 hospital discharges with diabetes-related conditions in Greenville County.
- In 2005, there were 688 emergency room (ER) visits for diabetes as the primary diagnosis, among which 312 (45%) were by African-American patients.
- There were 7459 ER visits for diabetes as a related condition.

- Medicare paid for 64% of the ER and Hospitalization charges in Greenville County (Fig 3).

Complications

- Almost all patients (97%) hospitalized in SC for diabetes had complications in 2005; 32% of hospitalizations in Greenville County (Table 1).
- In 2005, nearly three-quarters of people in SC with diabetes had hypertension, compared with only one-fourth of people without diabetes.

Table 1. Hospitalizations for Diabetes Complications in Greenville County in 2005.

Diabetes Complication	Hospital Admissions	Percent of Diabetes Hospital Admissions	Total costs
Renal Failure	1,512	21%	\$46,675,400
Lower Extremity Amputation	135	2%	\$5,957,300
Keto-acidosis	239	3%	\$5,210,100
Retinopathy	395	5%	\$13,087,700

- In 2005, more than 60% of people with diabetes have high cholesterol.
- In 2005, the rates for lower extremity amputations among blacks in SC were four times the rates among whites.

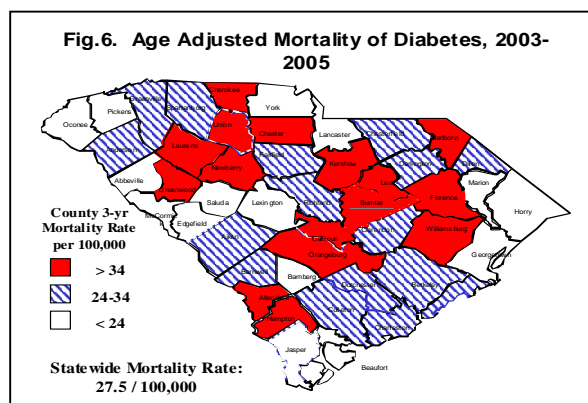

Mortality

- Diabetes is the seventh leading cause of death in Greenville County.
- A total of 120 people in Greenville County died from diabetes in 2005.

- The Greenville County mortality rate was 30.2/100,000 in 2005, above the state average.
- Greenville County ranks #21 in diabetes mortality in South Carolina 2003-2005.
